ProAdmin 3.23

Patches Log

This log documents changes to ProAdmin version 3.23 since its initial release.

10/28/2026

Data Dictionary

a. Add the Alt+O keyboard shortcut to the coded field mapping dialog box.
b. Fix audit trail when a Data Dictionary field is only referenced as an Input Pass Thru in an XML Output Linkage.

Plan Definitions

a. Improve the layout of the Plan Attributes dialog box.

Repository

a. Rename the "XML Schema" button on the Repository File Keys dialog box to "Import XML Schema."
b. Clarify error message when an XML lookup is attempted without an imported XML schema.

Calculations

a. Fix INDEX ERROR displaying relative value error messages.
b. Fix DOMAIN ERROR when using Late Retirement components and the 415(b) limit is not applicable.

Output

a. Fix potential DOMAIN ERROR viewing previously saved results when there are retroactive payments with multiple commencement dates.
